BARR'S "PURE" GRASS SEEDS

Produce Beautiful Lawns, Tennis and Cricket Grounds, Public Parks, Pleasure Grounds, etc.

Renovate Lawns, etc., in September, after the wear and tear of Summer. For renovating, 20 to 30 lbs. of Grass Seed are required per acre.

The following mixtures of Grass Seeds are all thoroughly cleaned, and cannot fail to give the greatest satisfaction. There are neither Clover nor coarse grasses in the mixtures.

To ensure a fine lawn, free from weeds and coarse grasses, it is most important that the soil to be sown should be quite clean, that is, free from the seeds of objectionable plants, and the grass seeds used should consist solely of the fine-leaved dwarf-growing grasses.

In sowing grass seeds always take advantage of rainy or damp weather, and after sowing, give a slight covering of clean finely-riddled soil; this, followed by rolling, when the soil is sufficiently dry, will ensure a successful vegetation. After this, frequent cutting and constant rolling will be necessary to have a fine smooth lawn.

No. 1. Thames Embankment Lawn Grasses, this special mixture has been very successful on the Thames Embankment, and in the formation and renovation of many public and private parks and squares around London and throughout the country. Per lb., 1/4; per 10 lbs., 12/9; per 20 lbs., 24/-; per 50 lbs. and upwards, at the rate of 1/2 per lb.

No. 2. Fine Lawn Grass Mixture for Improving Old Lawns or Laying Down New Ones, Croquet Grounds and Bowling Greens, in this mixture there is a larger quantity of small grasses than in No. 1, per lb., 1/5; per 10 lbs., 13/6; per 20 lbs., 26/-; per 50 lbs. and upwards, 1/3 per lb.

No. 3. Extra Fine Lawn Grass Mixture for Improving Old Lawns, or Laying Down New Ones, Croquet Grounds, and Bowling Greens, this is a specially fine mixture of dwarf growing grasses only, which make a finer, closer, and smoother turf, and does not require to be so often mowed as Nos. 1 and 2; it is specially adapted for select lawns. 1/9 per lb.; per 10 lbs., 16/6; per 20 lbs., 31/-; per 50 lbs. and upwards, 1/6 per lb.

No. 4. Barr's New Mixture of Dwarf Growing Grasses, specially recommended, when an extra fine, smooth lawn is required; the grasses are of the finest leaved kinds, and dwarfest growers, so that in using this seed a great saving is effected in mowing, besides having a perfect lawn. Per lb., 2/-; per 10 lbs., 19/-; per 20 lbs., 37/-; per 50 lbs. and upwards, 1/10 per lb.

Dutch Clover, Finest White, if Clover is desired, it may be added to the Grass Seeds, at the rate of 3 to 5 lbs. per acre. Per lb. 1/6.

HOW TO DESTROY WEEDS ON LAWNS.

WATSON'S WEED-DESTROYING LAWN-SAND will kill daisies, dandelions, plantains, etc., on Lawns, Croquet Grounds, etc., and is also a good fertilizer for the grass. Fuller particulars will be sent on application. Price for sample causter, 2/6 and 5/6; per 1/2 cwt. 9/6; 1 cwt., 18/-; 2 cwt., 34/-.

THE BEST FUNGICIDE, AND MOST EASILY APPLIED (full particulars on application).

TAIT AND BUCHANAN'S ANTI-BLIGHT POWDER, in 1/, 2/9, 5/6, 10/6, and 18/- quantities.

PURE ICHTHEMIC GUANO

FERTILIZES THE WORLD.

SUPPLIED BY

Ichthemic Guano

Ichthemic Guano is a valuable Manure, and is well adapted for use on all kinds of plants, and is especially adapted for use on the following plants:—

Chrysanthemums, Azaleas, and other shrubs. The *Chrysanthemum* and *Azalea* are the most valuable plants for which Ichthemic Guano is adapted. It is well adapted for use on all kinds of plants, and is especially adapted for use on the following plants:—
Chrysanthemums, Azaleas, and other shrubs. The *Chrysanthemum* and *Azalea* are the most valuable plants for which Ichthemic Guano is adapted. It is well adapted for use on all kinds of plants, and is especially adapted for use on the following plants:—
Chrysanthemums, Azaleas, and other shrubs. The *Chrysanthemum* and *Azalea* are the most valuable plants for which Ichthemic Guano is adapted. It is well adapted for use on all kinds of plants, and is especially adapted for use on the following plants:—

THE ROYAL
 PATENTS

For *Chrysanthemums, Azaleas, and other shrubs.* The *Chrysanthemum* and *Azalea* are the most valuable plants for which Ichthemic Guano is adapted. It is well adapted for use on all kinds of plants, and is especially adapted for use on the following plants:—
Chrysanthemums, Azaleas, and other shrubs. The *Chrysanthemum* and *Azalea* are the most valuable plants for which Ichthemic Guano is adapted. It is well adapted for use on all kinds of plants, and is especially adapted for use on the following plants:—

For *Roses* apply the solution (one tablespoonful to the gallon of water) beginning at the latter end of the year.
 For *Bulbs and Ferns*, use the Guano as a liquid manure only.
 For *Orchids*, mix in its dry state when potting, and afterwards use the solution, or dissolve in shallow pans of water and allow it to evaporate.
 For *Primulas, Geraniums, Fuchsias, Cinerarias* and similarly rooted plants, the Guano should be applied after potting, the Guano in its dry state being used mixed with the soil before potting or planting out (1 part Guano to 100 parts soil).
 For *Violets*, To secure Violets from October to March, mix lightly with the soil before planting, afterwards use in a liquid or dry state.
 For *Vegetables and Fruit* one cannot do better than follow the general directions given above. On the ground where it is intended vegetable seed should be sown, use one or two ounces per square yard as a top dressing, afterwards rake in, and if the crop is found to require further stimulant apply between the rows in the same way.
 For *Lawns and Grass* apply as a top dressing, one or two ounces per square yard. Distribution over the surface should be as even as possible.
 In all outdoor application the Guano is best used when there is a likelihood of rain or in showery weather; if hand watering is practicable much the better.

CAUTION.—Care must be taken to use no more than the prescribed quantity; carelessness in this respect has sometimes led to injurious results. TO BE KEPT DRY.

BARR & SON, 12 & 13 KING STREET, COVENT GARDEN, LONDON.

ENTERED AT STATIONERS' HALL.]

SPECIAL NOTICES.

- I. **Quality.**—When the Bulbs in Holland are in flower, we annually make a professional visit to the principal "bulb farms" to inspect the crops, and our supply of Dutch-grown bulbs is drawn from the healthiest "stocks" of the most reliable growers; we can therefore recommend them with the utmost confidence, and feel sure that if the bulbs receive proper cultural treatment they will give great satisfaction. *Simple and practical cultural directions head each family of bulbs, etc., in the following pages.*
 - II. **Experimental Grounds at our Nurseries, Long Ditton,** a few minutes from Surbiton Station, S.W.R. (close to the Surbiton New Recreation Grounds). Visitors will at all seasons find many things of interest and beauty in **Hardy Bulbs, Tubers and Herbaceous Perennial Plants.** In spring the brilliancy of our new Daffodils, Chionodoxas, Anemones, etc., surpasses description. From August to April one variety or another of our unique collection of rare Species of **Crocus** may be seen in flower, and in September and October there is a gay display of beautiful varieties of **Meadow Safrons.**
 - III. **Parcel Post.**—We shall in all cases use the **Parcel Post**, *when cheapest*, and the articles ordered weigh under 11 lb., and admit of being packed for safe transmission by "**Parcel Post**."
 - IV. **Carriage by Rail** may be deducted at settlement of account, on orders for Bulbs to any Railway Station in Great Britain, and to all ports on the Irish Coast (except goods coming under Clause VII.).
 - V. **Orders, paid in advance.**—Carriage in all such cases will be prepaid.
 - VI. **Returnsd Empties.**—A small charge is made for these, and if returned within a fortnight, allowance will be made for the same. *Returned empties should invariably have the sender's name on the address label for the identification of sender, and a notification be sent by post stating date of dispatch and name of Railway Company, that we may see that the empty is duly received.*
 - VII. **Fruit and Forest Trees, Shrubs, Plants in pots, Soils, Watson's Lawn Sand, Manures, Anti-Blight, and Insecticides**—on these we do not allow carriage.
 - VIII. **Five per cent.** may be deducted from accounts if paid within one month from date of invoice.
 - IX. **Money Orders and Postal Orders** to be made payable at Covent Garden Post Office; these and all cheques should be crossed, "London and County Bank." Small amounts may be remitted in Postage Stamps or Coin, in a Registered Letter.
 - X. **Daffodil Catalogue.**—The annually increasing importance attached to Daffodils for forcing, and as cut flowers, also for out-door decoration in beds, borders, and to naturalize in grass, has necessitated the issue of a special "**Daffodil Catalogue**," and to this we have added short lists of our well-known collections of "**English Amateur**" Tulips, Irises, Double and Single Pæonies, Christmas Roses, Lenten Roses, Lilies, Michaelmas Daisies, Perennial Sunflowers, Phloxes, Day-Lilies, Plantain-Lilies, and a few other specially beautiful Hardy Herbaceous Plants. Barr's Old English Tulips, to these the R.H.S. awarded, May 9th, 1893, a **Silver Flora Medal**, and May 25th, 1893, at the Temple Show, a **Silver Cup**. See page 13.
 - XI. **Naming Daffodils.**—Cut specimens of Daffodils we undertake to name correctly at the charge of 6d. each, 2s. 6d. per dozen, 15s. per 100, to cover attendant expenses. Address all cut specimens for naming, accompanied by a remittance, to our *Nursery, Long Ditton, Surrey.*
 - XII. **Cut Daffodil Flowers.**—When in bloom out-of-doors, cut specimens of our Daffodils, correctly named, we forward post-paid at a minimum charge to cover attendant expenses, thus offering a good opportunity to those who wish to extend their knowledge of these lovely flowers of spring. *Fees will be found under Special Notices, Daffodil Catalogue.*
 - XIII. **Medals, Certificates, &c.**—The Royal Horticultural Society, for many years past, have annually awarded to us, for our Exhibitions of Beautiful New Daffodils, &c., **Gold Medals, Silver Medals, Silver Cups, &c.**, with numerous Votes of Thanks, and many **First Class Certificates.** At the Second Great Daffodil Conference of the R.H.S., held from 15th to 18th April, 1890, our Grand Display of New Daffodils was awarded the **ONLY GOLD MEDAL.** Many **Medals, Prizes and Certificates,** have also been awarded to our **Beautiful Hardy Daffodils, &c.**, at the **ROYAL BOTANIC GARDENS, CRYSTAL PALACE, ROYAL AQUARIUM, EARL'S COURT EXHIBITIONS, &c.**, at whose large London Spring Shows **Barr's Daffodils** are always a great attraction. The awards received for 1894 have been **SIXTEEN MEDALS and FIVE CERTIFICATES.**
 - At the **Birmingham Daffodil Show**, held April the 18th, 1894, we were Awarded a **Silver-Gilt Medal (Highest Award)** for our Exhibit, and the **Premier Prize** for the **Finest Daffodil Exhibited.**
- Barr's Daffodil Silver Cup will be the great prize of 1895, see Daffodil Catalogue.*
Barr's Daffodil Prize Medals to be Awarded, Spring, 1895, see Daffodil Catalogue.
Barr's "English Amateur" Tulip Prize Medals to be Awarded, 1895, see Daffodil Catalogue.

NOTICES TO OUR FOREIGN AND COLONIAL CORRESPONDENTS.

- XIV. To insure prompt attention, *orders should be accompanied by a remittance, a draft, or an "order to pay," on a London agent; the remittance being sufficient to cover expense of cases, and also of carriage when the freight is required to be paid in advance.*
- XV. **SEEDS AND BULBS** can now be despatched in hermetically sealed cases to India at the rate of 8d. per lb., through the **Indian Parcel Post**, or by "**Express**" to the nearest port or railway station at a lower rate.
- XVI. **In shipping Bulbs and Plants** to India and the Colonies, great care is exercised by us in selecting, preparing, and properly packing the same. Still, there are so many contingencies, that we cannot, in any way, hold ourselves responsible for the condition in which plants or bulbs reach their destination.
- XVII. Our experience in *successfully preparing and shipping Seeds, Bulbs, and Plants* to India and the Colonies, extends over a long period.

[Barr and Son,

A FEW NOVELTIES AND SPECIALTIES.

170	Albuca Nelsoni, a most beautiful Cape bulb for south borders, bearing in June handsome spikes of almond-scented flowers, <i>pure white</i> , with <i>brown</i> stripe, or if grown under glass all <i>white</i> , doz. 15s.; ea.	s. d. 1 6

BARR'S BEAUTIFUL BEDDING HYACINTHS.

SPECIALLY SELECTED FOR OUT-DOOR CULTURE IN BEDS, RIBBONS, OR GROUPS.

When in Holland we selected these extra fine varieties of Hyacinths as being most suitable for bedding, having distinct and bright colours, a fine habit, and large flower spikes. They will also be found valuable for filling rustic baskets, flower boxes, vases, etc.

BARR'S BEAUTIFUL "RAINBOW" MIXTURES OF HYACINTHS.

FOR OUT-DOOR CULTURE IN BEDS, BORDERS, ETC.

- 282 "BARR'S BEAUTIFUL 'RAINBOW' MIXTURE OF HYACINTHS," this beautiful mixture of Hyacinths was specially arranged for by our Mr. Barr on the occasion of his visit to one of the large Dutch Bulb Farms in Holland. The colours are evenly blended, including red, scarlet, purple, lavender, porcelain, azure-blue, white, rose, blush, yellow, &c., producing a magnificent effect in flower beds and borders 1st size bulbs, per 100, 18/6; per dozen 3 0
- 283 "BARR'S BEAUTIFUL 'RAINBOW' MIXTURE OF HYACINTHS," for mixed borders, shrubberies, and naturalization 2nd size bulbs, per 100, 14/6; per dozen 2 3

POMPON, OR MINIATURE HYACINTHS.

These Miniature Hyacinths can be grown in small glasses, fancy pots, old china bowls, crystal dishes, jardinetts, etc., alone or associated with *Scilla sibirica*, *Chionodoxas*, *Crocus*, *Snowdrops*, *Dwarf Tulips*, and *Daffodils*, *Iris reticulata*, etc. Plant them in "Barr & Son's Prepared Mixture of Charcoal and Cocoa Fibre" (1s. 6d. per peck, 5s. per bushel); the surface may be covered with fresh green carpet-moss till the plants appear.

In children's gardens and small flower beds, these Miniature Hyacinths alone or intermingled with other dwarf spring-flowering bulbs, make a fine display throughout the Spring months.

ROMAN HYACINTHS AND NARCISSI for Early Forcing.

CULTURE.—Pot the bulbs 3 to 6, or more according to size, in a 4 or 5 inch pot, during August, September, and October; then place the pots out-of-doors on a bed of ashes, and with cocoa-nut fibre cover the pots a few inches. There let them remain till the bulbs are well rooted, and have made a little top growth; the pots should then be removed, a few at a time for succession, to a moderately warm and moist temperature, and plentifully supplied with water.

- 288 Roman Hyacinth, Early Dwarf White Sweet-Scented, universally prized in bouquets, and may be had in flower during October, November, and December, if treated as recommended above.
Extra large bulbs, 16s. per 100; 2s. 6d. per doz. | Fine selected bulbs, 13s. 6d. per 100; 2s. per doz.
- 289 Roman Hyacinth, Early Blush { a little later than No. 288, and }
290 Roman Hyacinth, Early Rose { with larger spikes, very sweet-scented. } 10s. 6d. per 100; 1s. 9d. per doz.
- 291 Roman Hyacinth, Early Blue, flowers from a fortnight to three weeks later than the White Roman Hyacinth, 10s. 6d. per 100; 1s. 9d. per doz.
- 292 Narcissus, "Early Snowflake" Paper White, Sweet-Scented, fine large free-flowering variety of Paper White Narcissus, in bloom with the Roman Hyacinth, if treated in the same way, 10/6 p. 100; 1/9 p. doz.
- 293 Roman Narcissus, Early Double, in flower with the Paper White Narcissus, if treated in same way, blossoms double white, with orange centre, in trusses, valued for bouquets and buttonholes, 5/6 p. 100; 1/1 p. doz.

[Barr and Son,

BARR'S CHOICE NAMED HYACINTHS.

FOR CULTURE IN GLASSES, JARDINETTES, POTS, AND FOR EXHIBITION.

The * indicates the Hyacinths with large flower spikes and single or semi-double blossoms, which we specially recommend for early forcing in pots, and for growing in glasses, jardinettes, &c.

The † denotes the varieties with double blossoms. These are not so suitable for growing in glasses and jardinettes, or for forcing. Those enumerated are a selection of the finest double-blossomed varieties in cultivation, and we recommend them for pot culture.

CULTURE.—Immediately the Hyacinth is potted, which may be done from September to December, place the pots out of doors on a bed of ashes, and cover with six inches of the same material, but a covering of cocoa fibre is preferable if it can be had; the bulbs should there remain exposed to all weathers until the pots are full of roots, and the tops are sprouted about an inch, which will be in about eight or ten weeks after potting. They may then be removed indoors, and if forced, this should be done gently in a moist airy atmosphere, and the bulbs plentifully supplied with water at the roots. To maintain a succession, arrangements should be made before covering for a portion to be removed indoors once a fortnight. If finely developed trusses and rich colours are preferred to very early flowers, the Hyacinth should remain longer out-of-doors and not be forced, but when removed indoors, the pots should be placed in a mild temperature such as that of a greenhouse, a sitting-room window, or a frame, keeping the plants close to the glass, and always in the most genial and sunniest situation, so that the plants develop their flowers gradually and naturally, water being given regularly and freely, as it is well known to professional cultivators that failures, for the most part with Hyacinths, arise from allowing the soil to become dry. Abundance of air is necessary, as also a moderately moist atmosphere; a dry or frosty atmosphere and a draughty situation will cause the flower buds to shrivel.

If the Hyacinth is grown in glasses, the base of the bulb should just touch the water, and a little charcoal placed in the glass to keep the water sweet. It is, however, preferable to fill the glasses with the prepared Mixture of Charcoal and Cocoa Fibre (see page 33 for directions). Place the glasses in a room without a fire, or, better still, in the shady part of a greenhouse, and when the plants have filled the glasses with roots, and have made a little top growth, then place them in the sunniest situation at command, till the flower spikes are well developed; the glasses may then be removed to where the flowers are to be enjoyed. Avoid a dry or frosty atmosphere and a draughty situation, as these are often causes of the flower buds shrivelling.

When cultivated in jardinettes, the Hyacinth may be associated with other early-flowering bulbs, such as Chionodoxas, Scilla sibirica, Tulips, Snowdrops, Crocuses, Nareissi, Iris reticulata, &c. Barr & Son's prepared Mixture of "Charcoal and Cocoa Fibre" should invariably be used (see page 33 for directions); the preparation must always be kept moist, and when the jardinet is removed to the sitting-room the surface should be covered with fresh green carpet moss.

BARR'S CHOICE NAMED HYACINTHS.

The varieties of Hyacinths described, and included in the selections offered, are those which we have personally selected during our many visits of inspection to the bulb farms of Holland, and which, from experience, have proved the most worthy of cultivation. *Bulbs all of extra fine quality.*

[Barr and Son,

BARR'S BEAUTIFUL HARDY DAFFODILS (Narcissi).

In our DAFFODIL CATALOGUE a detailed descriptive list of the best Daffodils will be found.

For filling beds and planting in groups in mixed borders and shrubberies, no flowers of spring can compare with the Daffodil, and when naturalized in woodland walks, or forming large groups in grass, or planted on sloping banks, the effect Daffodils produce is splendid. (See page 3 of *Daffodil Catalogue for Mr. William Robinson's experience.*)

 Supplying Cut Specimen flowers of Daffodils, correctly named, see Special Notices, in Daffodil Catalogue.

The cut flowers are much prized for their graceful beauty
per 1000. 42/; per 100, 5/6; per doz. 1/0.

POLYANTHUS, OR BUNCH-FLOWERED NARCISSI.

The *Polyanthus Narcissus* has rich golden-yellow or snow-white sweet-scented flowers, and is specially adapted for winter and spring decoration in pots and jardinetts. The effect is greatly enhanced when three bulbs are grown together in a 6 or 7-inch pot. The culture is the same as that of the *Hyacinth*. For flower beds and mixed borders, the *Polyanthus Narcissi* are great favourites.

Where flowers are in demand in November, December, and early in January, the Paper White "Early Snowflake" and Double Roman Narcissi are invaluable, and when forced as required, these and the Roman Hyacinths (see culture, page 6) can be had in bloom from November.

King Street, Covent Garden, 1894.]

THE SACRED, OR GOOD LUCK LILY OF CHINA AND JAPAN.

Called by the Chinese, "Jos Flower," or "Flower of the Gods," and "Water Fairy Flower."

This is a species of *Polyanthus Narcissus* annually imported from Northern China, and prized for the abundance of its flowers and marvellously rapid growth. The flowers are white, with yellow cup, and very fragrant. Each bulb usually produces several flower spikes, each bearing many flowers, and the Chinese call the best cultivated and largest developed blooms, "Grand Emperor." In China and Japan the bulbs are grown in the living rooms in fancy bowls filled simply with pebbles and water, and the natives compete with one another in growing the finest specimens for their New Year's Festival, successful culture being regarded as an emblem of "Good Luck." The bulb in this country can be grown as successfully as in China, and it is most interesting to watch its rapid growth, which is something like 20 inches in forty days, placed in a sunny window by day, and on a table near the fireplace by night, as frost destroys the flower buds. The natural atmosphere of a warm greenhouse suits the flower well. Fuller particulars of culture sent with the bulbs. Orders now booked for immediate delivery on arrival.

SWEET-SCENTED JONQUILS.

The Double and Single Jonquille are prized for their graceful sweet-scented flowers in or out of doors. For in-door decoration three to six bulbs should be grown in a 4 or 5-inch pot, and cultivated the same as the Hyacinth in all respects, whether for early flowering or succession. If planted out-doors and treated the same as hardy Daffodils, a long succession of these sweet-scented flowers for room decoration may be maintained.

[Barr and Son,

THE TULIP.

Our Single and Double Tulips were awarded First Prize International Hort. Exhibition, London, 1892.

The Tulip is extremely hardy, and of easy culture, flowering as freely in the shade as in the sunshine, and producing as fine flowers in a confined town garden as in more favoured places. Double and single Tulips, when mixed together and planted in front of shrubs, maintain a longer display than if either are planted separately. In gardens where the flower beds must be kept gay from the earliest dawn of Spring, plant between the lines of Tulips, Scilla sibirica, Chionodoxas, Snowdrops, or Crocuses; these flower first, and when out of bloom the leaves form a charming green groundwork for the blossoms of the Tulip.

EARLY SINGLE TULIPS.

Those alone who have massed the different varieties of Single Tulips (planting the bulbs 4 to 5 inches apart), can form an idea of their great beauty and the rich diversity there is in shade and colour, and the grand effect they produce grouped in flower beds or borders. The Single Tulip is extensively grown for indoor decoration (three or five bulbs in a pot), and cultivated in the same way as the Hyacinth for early-flowering and succession.

The varieties of the Early Duc Van Thol Tulip, Nos. 538 to 543, flower together, and are of the same height, which renders them valuable for beds and borders, where an early Spring display is required, also for forming designs. For early-forcing, to bloom with the Roman Hyacinth and Double Roman and Paper White Narcissi, the scarlet and yellow Duc Van Thol Tulip, No. 537, is extensively used.

DOUBLE TULIPS.

Double Tulips have massive flowers of brilliant and beautifully diversified colours, and are very effective in beds on lawns, terraces, etc., also as edgings to Rose beds and shrubberies. Planted in groups of three or more in flower and shrubby borders, they are very attractive.

King Street, Covent Garden, 1894.]

DOUBLE TULIPS—*continued*.

For sectional lines, where the Early Single Tulip is planted in designs, the **Tournesol**, No. 597, being also early, is most valuable; it is excellent to force for early-flowering, and is grown extensively for Covent Garden Market. **Imperator Rubrorum** the best scarlet, **Tournesol Yellow** the best yellow for indoor decoration. These Double Tulips should be planted three bulbs in a pot, and receive the same cultural treatment as the Hyacinth. In beds or large masses, **Rex Rubrorum**, scarlet, blended with **La Candeur**, white, produces an unrivalled effect in the Spring flower garden. *Plant the bulbs six inches apart.*

PARROT, or DRAGON TULIPS, with Laciniated Petals (*May-flowering*).

These have large, characteristic blossoms with curiously lacinated petals, and richly varied shades of beautiful colours in the same flower. They are very remarkable and exceedingly showy and effective in flower borders, while if grown in hanging baskets, the drooping flowers look like orchids.

The varieties under name are all selected strong bulbs, and each may reasonably be expected to bloom; but as there is an unaccountable uncertainty in the flowering of these Parrot Tulips, we advise that they be not used for filling beds, but simply planted in flower borders, or naturalized.

12 bulbs each of the Parrot Tulips named below, 8s. 6d.; 6 each, 4s. 6d.

Barr's Beautiful "ENGLISH AMATEUR" Tulips.—May-flowering.

Awarded by the Royal Horticultural Society a Flora Medal, May, 1893, and again 1894.

Awarded at the Temple Show, the Royal Horticultural Society's Silver Cup, May 25th, 1893.

These beautiful Tulips in the South of England commence flowering according to the earliness or lateness of the season, from the first to the last week in May, and may be enjoyed for a month. The "ENGLISH TULIP" is pre-eminently an amateur's flower, and has been so for upwards of 300 years. Amateurs who may be induced to take up Tulip culture should read the following extract from the *Manchester Guardian*, 2nd June, 1892, from the pen of the late Mr. Samuel Barlow, one of the greatest authorities on "ENGLISH AMATEUR" TULIPS:—

"The best *Amateur* Tulips known to exist, or that have ever existed, have been raised in England, principally in the Northern counties—Lancashire, Yorkshire, and Derbyshire. Over forty years ago the late Dr. Hardy, of Warrington, in a series of papers to the *Midland Florist*, completely settled all the points of excellence which go to make a first-class Florist Tulip, and his definitions have never since been disputed. Since then the cultivation of Florist Tulips has much improved, especially in the three counties named, although, singular to say, it has almost died out in the South of England, where, fifty years ago, the most enthusiastic Tulip growers made London their centre for exhibitions. There are distinct evidences now of a revival of interest in the *South* of this grand old flower, and I hope that the Exhibitions of the Royal National Tulip Society will give additional stimulus to the cultivation and love for this fascinating flower."

Our Collection is large of "English Amateur" New Florists' Tulips, and, together with Old Scotch and Dutch varieties, about 20,000 bulbs will be planted this Autumn, and the flowers may be seen during May, 1895, at our Long Ditton Nurseries, a few minutes' walk from Surbiton Station, on the South Western Rail. A Detailed List of a select few of these "ENGLISH AMATEUR" TULIPS will be found in our *Dafodil Catalogue*, together with further notes and information. The assortments offered below we recommend to those about to become "Tulip Amateurs."

Barr's "English Amateur" New Florists' Tulip Prize Medals for 1895, will be awarded by the Royal Horticultural Society, 117, Victoria Street, Westminster, London, at three or four meetings in May and June, to give exhibitors from North and South equal chances for competition.

King Street, Covent Garden, 1894.]

The Crocus is one of the earliest flowers of Spring, and occupies a prominent place in every garden. Planted as an edging in triple lines of one or more colours, the effect is striking. No Spring display surpasses that of broad wavy bands of golden-yellow, striped, purple, or of pure white Crocuses, when they expand their blossoms in February and March. In lawns and pleasure parks, planted in the grass, the Crocuses are extremely effective. For several years past in "**Rotten Row**," and other of the **Royal Parks**, Crocuses, Snowdrops, Daffodils, &c., have been planted in the grass, to the great delight of visitors, and the enhanced decoration of the parks. In wild gardens, woodland walks, etc., the Crocus should be associated with the violet, the primrose, and the oxlip.

To encourage extensive planting in shrubberies, woodlands, wild gardens, in grass, on lawns, pleasure parks, etc., Crocuses are quoted by the thousand cheaply. For a gorgeous effect in early spring nothing can equal the **Golden Yellow Crocus**, masses of which will attract the eye at a great distance.

[Barr and Son,

SNOWDROP (*Galanthus Nivalis*, etc.)

In the early Spring months, there is nothing more beautiful than a sheet of the snowy graceful blossoms of the Snowdrop. In planting an edging, mass, or a bed, whether in the turf of the lawn or in the flower garden, the bulbs should almost touch each other. A bed of surpassing beauty may be arranged, Snowdrops in the centre, with a deep fringe of bright blue *Scillas sibirica* or *bifolia*, *Chionodoxa Luciliæ*, *C. sardensis*, or *C. gigantea*; a charming effect is also produced by intermingling in the proportions of two-thirds Snowdrops to one-third *Scillas* or *Chionodoxas*. When practicable such plantings of the Snowdrop should be permanent, and the surface of the soil in Summer top dressed and sown with annuals, such as *Nemophila*, *Leptosiphon*, etc., or planted with surface rooting bedding plants. The Snowdrop and the *Crocus* when planted in alternate circles are very effective, and follow each other so closely, that no gap is left in the succession.

In beds of Tulips and Hyacinths, Snowdrops are very effective between the lines; they flower while these bulbs are just moving the surface, and when the flowers are over there remains an elegant groundwork of green foliage, or if the foliage is not desired, it can be cut down close to the soil.

The Snowdrop is most generally used for permanent edgings and masses, though in the fringes of lawns, where the grass need not be cut till May, and in pleasure parks, nestling in the grass, it looks, perhaps, most at home. In planting in grass, the turf need not be disturbed, but holes about three inches apart and five inches deep should be made with a dibber, dropping in three inches of fresh soil, then three or more bulbs. Snowdrops when planted on banks and grass slopes, look lovely. *The New Giant Single Snowdrop, Galanthus Elwesii*, should be extensively used; its flowers are large and valuable for cutting. The *Chionodoxas* are charming companions to *Elwes' Giant Snowdrop*; indeed, both are found growing wild together, and as Nature is never found out of harmony, the information may be suggestive to those who desire to follow her guidance in intermingling these early spring beauties.

Galanthus Elwesii is a distinct and beautiful species from the mountains near Smyrna, the largest and most handsome of all Snowdrops. It has large pure white globular segments, with rich emerald-green and white tube; when first opening, the shape of the flower reminds one of the *Fuchsia globosa* in form, but much larger.

For other Beautiful New and Autumn-flowering Snowdrops, see Novelties, page 3.

CHIONODOXA (Glory of the Snow).

The *Chionodoxa* is now so widely known and appreciated, it appears almost superfluous to say anything in its praise. The bulbs are now very cheap, and as Mr. William Robinson in his paper at the Conference on Hardy Flowers recommends it for naturalizing, we may just add we feel sure that, naturalized, the *Chionodoxas* will afford lasting pleasure. The species offered are gems amongst spring flowers.

Chionodoxa Luciliæ (*The Glory of the Snow*), the most beautiful of all dwarf blue spring-flowers, and unsurpassed for edgings and masses in flower borders and on rockwork; colour deep *Nemophila*-blue, with clear snow-white centre. Mr. George Maw, in describing the circumstances under which he found the *Chionodoxa Luciliæ*, says, "At the lower level it was out of flower, but near the summit of the mountain a mass was met with in full splendour, forming one of the most sumptuous displays of floral beauty I ever beheld; a mass of blue and whites, resembling *Nemophila insignis* in colour, but more intense and brilliant." Had Mr. Maw seen *C. sardensis* and *C. gigantea*, we feel sure he would have been filled with perhaps even greater enthusiasm. The *Chionodoxa Luciliæ* was figured in *The Garden*, July 3rd, 1880, and in 1878 the Floral Committee of the R. H. S. awarded to our specimens a First-Class Certificate.

743 <i>Chionodoxa Luciliæ</i> , Fine Home-grown Bulbs	p. 1000, 30s.; p. 100, 3s. 6d.; p. doz. 6d.
744 " " " " " extra selected	" 40s.; " 4s. 6d.; " 8d.

Chionodoxa sardensis, introduced by us in 1883. A First-Class Certificate was awarded to our plants, 1885, by the R. H. S., also by the Royal Botanic Society. *The Garden* of 14th March, 1885, refers to it thus:—" *Chionodoxa sardensis* is a gem among spring bulbs—one of the rare really blue flowers. A good sized patch is strikingly brilliant, the petals are coloured nearly to the centre." The deep gentian blue of this flower renders it so striking that for distant effect it cannot be too highly recommended.

746 " " " " " Collected Bulbs, extra large	" 25s.; " 3s.; " 6d.

Beautiful Coloured Plate of *C. Sardensis*, sent for 6d.

747 *Chionodoxa gigantea* (*C. grandiflora*), a very distinct and beautiful species, with flowers twice the size of *C. Luciliæ*, more open, and of a beautiful soft lavender-blue, with white centre. The habit is dwarf, and robust. This is a most valuable acquisition to our Spring flowers. A First-Class Certificate, Spring, 1891.

748 " " " " " Fine Home-grown Bulbs	per 100, 7s. 6d.; per doz. 1s. 3d.
749 " " " " " extra selected	" 10s. 6d.; " 1s. 6d.

749 *Chionodoxa Alleni* (new 1892), resembling *Gigantea*, but bearing more flowers a little larger in size and of a slightly lighter shade, foliage broader and more massive.

Home-grown Bulbs, extra selected.....per 100, 17s. 6d.; per doz. 2s. 6d.

King Street, Covent Garden, 1894.]

SCILLAS—continued.

SCILLAS, VARIOUS SPECIES.

Peruviana and *Ciliaris* are the giant-flowering Scillas of Summer, and when established are grand border plants. *Autumnalis japonica* has beautiful rose-coloured flowers, and blooms from August. *Italica* is very beautiful and well worthy of a select spot on rockeries.

PUSCHKINIA.

The beautiful variety of Puschkinia we offer is a first-class dwarf hardy April-flowering bulb, and should be represented in the permanent flower borders of every garden; it is charming on rockwork, and is also a very pretty in-door pot-plant (6 bulbs in a pot). A coloured plate of it appeared in *The Garden*, 1878 and 1881.

LILY OF THE VALLEY. *For forcing, and making plantations out-of-doors.*

The clumps of Lily of the Valley quoted, have been specially prepared, and cannot fail to give abundance of flowers. In potting, the top of the crowns should be one inch below the rim of the pot; *tight potting* is of great importance, and care should be taken, in the *first watering*, that the moisture penetrates to the *centre of the clump*. Prepared crowns are now extensively used by the growers for Covent Garden Market, who put 20 to 30 in a 5-inch pot. The *Berlin Crowns* are the best for very early forcing. The prepared clumps we think will be found by private growers preferable to crowns. The supply of *Extra Selected Clumps* being limited, orders should be booked early, for dispatch in November.

CULTURE.—A moist atmosphere and abundance of water is indispensable to success in forcing Lily of the Valley; therefore, to encourage simultaneously the development of flower and foliage, most growers place the pots in a shady damp part of the house, or invert a flower-pot over the crowns, till the flower and the foliage have made some progress, then they are removed to a less shady situation. If they are grown in a dry atmosphere, or get an insufficient supply of water at the roots, the crowns, technically speaking, "go blind."

NATURALIZATION.—The Lily of the Valley is admirably adapted for this purpose, and the Dutch Crowns will be found the best.

DIELYTRA (LYRE FLOWERS). *For forcing, or planting out.*

The most elegant of all forced plants for conservatory and room decoration, also to cut for furnishing vases. The graceful pendant branches are loaded with beautiful rosy crimson heart-shaped flowers, and furnished with the most delicate rich green foliage. In shrubberies or herbaceous borders, few plants in summer are so attractive as the Lyre Flower.

	each—s. d.		each—s. d.

SPIRÆA (THE MEADOW SWEET). *For forcing, or planting out.*

The large graceful, feathery, pure white, fragrant flowers of *Spiræa japonica* and the new variety *compacta multiflora* surpass all else in this way to cut for furnishing vases, while the plants are amongst the most decorative for the conservatory and room. In forcing, a moist atmosphere and abundance of water is necessary. *Spiræa palmata* has feathery clusters of lovely rosy crimson blossoms, which for vases are greatly prized. *Spiræa japonica fol. aureo-reticulatis* is a most handsome and ornamental plant, and forces as easily as *S. japonica*. In sheltered moist borders out of doors these plants are very decorative.

For other Species of *Spiræas*, see PLANT CATALOGUE.

IRISES.

Irises are the "Orchids" of the flower garden. Their blossoms are the most rich and varied in colour of hardy plants; their time of flowering ranges from Christmas to August. They should be extensively planted in flower and shrubbery borders, and naturalized. As cut-flowers Irises are most valuable, competing in richness and variety of colour with the choicest and the most beautiful Orchids. For Beautiful Bearded and Beardless Flag Irises, also Japanese Flag Irises, see *Daffodil Catalogue*.

All the Irises are admirably adapted for cutting, and when it is necessary to forward the flowers to a distance, gather when the buds are colouring and just before expanding, as they open freely in water.

ENGLISH IRIS (THE LARGE FLOWERED BULBOUS IRIS OF THE PYRENEES).

Bulbs supplied September to December.

These magnificent Irises thrive best in a well-drained light or medium soil; when the soil is very heavy surround the bulbs with sand and see well to drainage. When convenient plant as soon after the beginning of September as possible. We have planted as late as December, and even in January; but the earlier the planting is done, the greater the success. The varieties offered have been specially selected from several of the largest and best collections, as being the finest and most distinct, and will be found as *strikingly beautiful and varied in colour as the most sumptuous orchids of the hot-house*. They flower in June, thus succeeding the Bearded Flag Irises.

Our Annual Exhibits of cut flowers of these grand Irises, at the London Summer Shows, attract much attention and elicit great admiration.

SPANISH IRIS (THE ORCHID-LIKE BULBOUS IRIS OF SPAIN). *June-flowering.*

Bulbs supplied September to December.

The Spanish Irises are in flower a fortnight before the English, and differ from them considerably, the flowers being smaller, and the arrangement of colours quite different. The curious and charming blendings of shades in the same flower give them the appearance of rare orchids, which in grace and beauty they quite equal. The cut flowers are greatly prized for vases and bouquets. *Cultural treatment same as for the English Iris*. As pot plants they are most valuable, and will bear gentle forcing. See Coloured Plate in *The Garden*, 1881.

[Barr and Son,

SPANISH IRIS—continued.

Our Annual Exhibits of cut blooms of these beautiful Irises form a great feature of attraction.

VARIOUS BEAUTIFUL BULBOUS AND TUBEROUS-ROOTED IRIS SPECIES.

These Iris Species are all hardy and beautiful, flowering one after the other from November to June. The dwarf early species would be more enjoyed if planted on rockwork, there the flowers would be a little protected from heavy rains. *Alata*, *Reticulata*, *Histrio* and *Histrioides*, *Variani*, and *Stylosa* vars., are charming winter-flowering species, followed in February by other *Reticulata* varieties, which have lovely violet-scented blossoms, the sweet-scented *Persica*, the beautiful new species *Rosenbachiana*, *Kolpakowskiana*, *Bakeriana*, and *Danfordiae*. Next in succession come the interesting *Caucasica*, *Orchoides*, the curious Snakeshead Iris *Tuberosa*, and the new species *Sindjarensis*. These are followed closely by *Sustana*, *Iberica*, etc., with their large handsome beautifully netted flowers; along with these Iris, *Atrofusca*, *Atropurpurea*, *Bismarckiana*, *Gatesii*, *Lorteti*, *Lupina*, *Maria*, and *Suworowii*, surpass in beauty and interest any written description that can be given of them. The charming dwarf Iris *Arenaria flavissima*, the pretty Peacock Iris, and the beautiful Iris *cristata*, flower in May, and are followed in June by Iris *Juncea*, *Boissieri*, *Lnsitanica*, and *Tingitana*.

The Irises marked * belong to the *Oncocyclus* and *Regelia* Sections, and require special treatment. The roots should be planted in November (the tops not more than two inches below the surface) in a light rich well drained soil, which has been previously well dug. Cover with three or four inches of straw, which remove in March, and until in bloom encourage a free growth. Immediately the flowering is past place over the plants a light, or panes of glass elevated eighteen inches above the ground, so as to admit at the sides a free entry of air, and at the same time to keep off rain. Keep the glass on till October. The object to be attained is that the roots shall thoroughly ripen and be prevented from starting into growth before Spring. The light covering in winter keeps off heavy rains, and prevents a too premature growth. By following the above plan the roots can remain undisturbed for several years, which is found to suit the plants better than lifting annually. The great beauty of these Irises, especially when seen in established masses, will fully repay the special treatment they ask for.

For an interesting history and description of the various *Oncocyclus* and *Regelia* Irises, see Prof. Foster's article in *Garden*, February 18th, 1893. The Rev. Henry Eybank, Isle of Wight, has met with great success in growing these Irises on raised beds (for full particulars, see "Garden," May 13th, 1893). (A Beautiful Coloured Plate of *Oncocyclus* Irises, *Gatesii*, *Lorteti*, and *Lupina*, can be had for 6d. Another Coloured Plate of Irises, *Atrofusca*, *Bismarckiana*, *Atropurpurea*, and *Maria* for 6d.)

King Street, Covent Garden, 1894.]

{ *Barr and Son,*

IXIAS, MORPHIXIAS, SPARAXIS, TRITONIAS, AND BABIANAS.

CULTURE IN-DOORS.—From September to January plant in a four or five-inch pot five or six bulbs, using a compost of turfy loam, leaf soil, and silver sand. Make the soil firm about the bulbs, then plunge the pots in ashes in a cold pit or frame, and withhold water till the plants appear, and at first give sparingly. When the plants are in growth, the lights should be left off, except during wet or frosty weather. Early in February, or when the plants have made sufficient growth, remove them to the greenhouse, keep close to the glass, and carefully attend to the watering.

CULTURE OUT-DOORS.—Plant from October to January, at a depth of three inches, and two inches apart, in a prepared light loamy soil, thoroughly drained, the bed raised six inches above the general level, with a due south aspect. Should the earlier plantings make foliage in autumn, slight protection must be given especially during severe frost. The later plantings will flower after the earlier ones, therefore select a situation for them where the sun's rays will be somewhat broken, and thus the blooming period will be prolonged. The gorgeous beauty of these flowers amply rewards the little extra care they require to ensure success.

IXIAS.

The *Ixia* is a slender graceful growing plant, with long loose spikes of bloom. The colours are rich, varied, and beautiful, the centre always differing in colour from the other parts of the flower, so that the blossoms expanding in the sun's rays, present a picture of gorgeous beauty.

NEW VARIETIES OF POPPY ANEMONES (*A. Coronaria*). *Plant Autumn and Spring.*

1041 *Anemone*, "Glory of the South" (nsw), this is a grand new *Anemone*; the flowers are single and very large, with broad rich brilliant scarlet petals and a rich blue-black central boss. A flower of great beauty and fine substance, per 100, 10/6; per doz, 1/6.

1042 *Anemones*, "St. Brigid," a very lovely strain of *Anemones*. The flowers are very large, mostly semi-double, and of the most brilliant and varied shades of colour. All flowers show a handsome blue-black central boss, have a graceful habit, and are remarkably free-flowering, per 100, 10/6; per doz. 1/6.

1043 *Anemone*, "St. Brigid," Largs Crimson-scarlet, strikingly beautiful semi-double flowers, per 100, 6/6; per doz. 1/3.

These Starry-flowersd singles Anemones are remarkable for variety of brilliant colours, elegant flowers, and graceful foliage. A light well-drained soil and warm sheltered situation suit them best ; on rockwork they look charming. They also make good pot-plants with six roots in a pot. *Plant September, October and November.*

	p. 100.	p. doz.

1044 Choice mixed, all colours, valuable to cut for bouquets, etc.	10	6...1 6
1045 "Jewel" (new), <i>ruby-violet, glittering white centre, a most beautiful flower</i>	7	6...1 3
1046 "Scarlet Gem," <i>brilliant crimson-scarlet flowers with silvery centre, very showy</i>	8	6...1 3

Anemone fulgens is the most brilliant and graceful of all Winter and Spring-flowering Anemones. The rich *dazzling scarlet* flowers, and light elegant growth, render it the most attractive scarlet flower of Spring. It is invaluable for table bouquets or vases, as it lasts a long time in water. If the roots are planted early in Autumn, flowers, weather permitting, may be gathered from Christmas; its hardness is beyond all question, so that roots may be safely planted any month from August to May. *The plantings made April and May should be in a situation where in summer the ground is moist, and the sun's rays do not fall on them after 10 or 11 a.m.* (Figured in *The Garden*, 1877.) p. 100, p. d.o.

Anemone apennina, the blue Mountain Windflower, forms a dense cushion of rich blue, and is one of the loveliest dwarf Spring flowers. *A. blanda* resembles *A. apennina*, but flowers a month earlier. The varieties of *Anemone nemorosa* literally carpet the ground with their charming flowers. *A. nemorosa Robinsoniana* is remarkably beautiful, and *Anemone nemorosa bracteata* may be called "the Jack in the Green" of Anemones, the white petals resting on a profusion of green bracts. *A. pulsatilla* flowers spring and autumn. All the above-named species are charming on rockwork. *A. rivularis* is a very ornamental spring-flowering variety. As pot-plants these Anemones are very charming. *A. japonica*, white, rose and red, are the most decorative of Autumn-flowering herbaceous plants. Mr. William Robinson in his paper at the Conference on Hardy Flowers described the fine effect of *Anemone apennina* when planted in meadows or near to large elm trees (the flowers and foliage passing away before haymaking time); Mr. Robinson also recommends that *Anemone japonica* be planted in rough places outside the garden.

GREENHOUSE CYCLAMEN (*C. perelcum*).

From November to March, *Cyclamen periculum* is brought in large quantities to Covent Garden Market, many of the specimens having upwards of two hundred flowers. It is an indispensable plant for indoor decoration, and few flowers are more highly prized for button-hole bouquets, ladies' dresses, and finger-glasses. It may be cultivated in a cool greenhouse, or cold frame, with a little winter protection; but it is in a temperature of 45° to 60° the Covent Garden growers produce their fine plants, and these are mostly from seed sown in November, and not allowed to go to rest till they have flowered the following winter.

1075 *Cyclamen perileucum grandiflorum*, fine large-flowered varieties for Greenhouse decoration, per doz., according to size of plants, 15s., 21s., 25s., and 30s.; each, 1s. 6d., 2s., 2s. 6d., 3s. 6d., and 5s. 6d. (Seed 2s. 6d. and 3s. 6d. per packet.)

1138	"	Extra Large Bulbs	10	6.....I	6

The flowers of this new race of Gladioli are entirely distinct in form and markings from the Gandavensis varieties; the colours are very beautiful, and the large blotches on the lower petals render the flowers most attractive. They are vigorous growing and hardy, and bloom during the period between the early-flowering and late-flowering Gladioli.

PART II.

DESCRIPTIVE LIST, ALPHABETICALLY ARRANGED, OF VARIOUS BULBS
AND TUBEROUS-ROOTED PLANTS.

Those marked thus * ripen late and will be ready to send out from the middle of October to March. All other bulbs, etc., are ready for despatch from 1st September. Orders which embrace later ripening bulbs, etc., will be executed in two parts, carrying forward those not ready for delivery, till they are safe to move.

The height of the plants is given in feet and inches. In most cases cultural notes are added.

1236	" <i>psittacina</i> , bright crimson flowers splashed green and mahogany, 3 ft.....per doz. 2s. 6d.	0 3
1237	" <i>pulchra</i> (tricolor), white and yellow flowers, striped and blotched crimson...p. doz. 4s. 6d.	0 6
1238	" <i>in fine mixture</i>	per 100, 12s. 6d.; per doz. 2s. ...

These beautiful *Alstroemerias*, or Peruvian Lilies, are very easy to cultivate, and produce in summer abundance of valuable cut flowers, which last long in water. Their showy and attractive flowers render them useful border plants. Plant 6 inches deep, and by preference close to a wall, protecting, the first winter, with leaves or litter. *A. pelegrina* protect every winter.

1239	* <i>Amorphophallus Rivieri</i> (Umbrella Arum), a very handsome plant, with large palmate leaves, 2 to 3 ft. in diameter, on a white spotted stem; plant out of doors in April or pot up earlier.....	2 6
1240	* <i>Anomatheca cruenta</i> , a charming dwarf pot-plant, with small bright scarlet, crimson-blotched flowers, for edgings out of doors, ¾ ft.; plant in Spring	per doz. 2s. 6d. 0 3
1241	* <i>Antholyza coccinea</i> , a very beautiful bulbous plant, bearing in summer handsome spikes of gorgeous vermilion-scarlet flowers on a reddish-brown stem	per doz. 2s. 6d. 0 3
1242	* <i>Apios tuberosa</i> , a rapid growing elegant hardy deciduous climber, for arbours, trellises, &c. p. doz. 3/6	0 4
1243	<i>Arum cornutum</i> , red flowers, spotted black, stem curiously marbled, handsome foliage...per doz. 4s. 6d.	0 6
1244	" <i>crintum</i> , flowers reddish brown, and of immense size, stem marbled	1 0
1245	" <i>dracunculium</i> , large purple-red and black-blue flowers, marbled stem, very handsome p. doz. 4/6	0 6
1246	" <i>italicum</i> , flowers greenish white, followed by spikes of scarlet berries, leaves spotted	0 4
1247	" <i>palaestinum</i> (syn. <i>sanctum</i>), The Black Calla, flowers velvety black inside, olive-coloured outside, sweet-scented, handsome ornamental foliage, spring-flowering	per doz. 10/6 1 0

The *Arums* are very interesting and more or less handsome plants. *Dracunculium* and *Italicum* are quite hardy; the other species require winter protection with ashes, leaves, litter, or cocoa fibre, and should be grown by preference on a sunny border, in light loamy soil.

			each—s. d.	
1249	* <i>Begoniae</i> , Large-flowered varieties in colour for Bedding, crimson, scarlet, rose, white, orange, and yellow; each colour separate	per 100, 45s.; per doz. 6s.		
1250	* " Choice mixed large-flowered varieties for bedding	per 100, 30s.; p. doz. 4s. 6d.

These are the Butterfly Tulips or Mariposa Lilies of California, and possess such delicacy and brilliancy of colour that the most observant are struck with their characteristic beauty. They bloom from June to July; height 1 ft. The bulbs should be lifted when done flowering, kept dry, and be planted late in autumn. They like a sunny dry situation, such as the foot of a south wall, or the sunny part of a rockery, or they may be grown in pots. We offer only strong home-grown bulbs.				
1288	<i>Camassia esculenta</i> , pretty star-shaped blue flowers, in long graceful racemes, 1½ ft., p. 100, 5/6; doz. 10d.	...

1358	" " <i>Nuttallianum</i> , a very rare species, with golden-yellow flowers, and dark green foliage		3 6

In spring there is no prettier sight than a mass or edging of *Dog's-Tooth Violets*, with their beautiful variegated foliage and graceful Cyclamen-like flowers, ranging in colour from deep purple to the purest white. The large handsome American varieties of *Grandiflorum* are strongly recommended; they prefer a partially shaded and moist situation. Mr. William Robinson, referring to the *Dog's-Tooth Violets* (*E. dens-canis*), in his paper at the Conference on Hardy Flowers, says, "This beautiful and delicate-looking plant surprises me at the free way it grows in grass where I have planted it." Mr. R. has unconsciously imitated nature. In the high Pyrenees it abounds in the grass.

		each—s. d.

COCOA FIBRE, superior quality, 1s. per bush.; 4 bushels for 3s. 6d.

HOW TO PREVENT OR CURE POTATO DISEASE AND MILDEW ON VINES, TOMATOES, HOPS, FRUIT TREES, ROSES, ETC.

USE

TAIT AND BUCHANAN'S ANTI-BLIGHT AND MILDEW POWDER, THE BEST FUNGICIDE YET DISCOVERED.

Experience has proved this to be the most efficacious antidote in use for the cure or prevention of mildew. It has been tried with equal success on *Potatoes, Vines, Tomatoes, Hops, Cucumbers, Peas, Roses, Fruit Trees and Bushes, also on Chrysanthemums, Heaths, and other indoor plants.*

Fuller particulars on application. Prices, 1 lb., 1s.; 3 lbs., 2s. 9d.; 7 lbs., 5s. 6d.; 14 lbs., 10s. 6d.; 28 lbs., 18s.; 56 lbs. 35s.

MALBEC BELLOWES, the best and quickest powder distributor, price 7s. 6d. each.

" **IMPROVED**, with self-acting interior agitator, 8s. 6d. each.

WATSON'S WEED DESTROYING LAWN SAND.

This Preparation has the remarkable property of destroying Daisies, Ribbed Grass, Plantains, Dandelions, and other Weeds which have bulbous or tap roots; and at the same time of improving the Grass, by enriching the colour and thickening the sward. It may be applied at all seasons, but an annual application in Spring not only destroys the Seedling Weeds, but, by invigorating the grass, prevents, to some extent, the burning up during hot dry weather. *The "Lawn Sand" is clean, easy of application, and inodorous.* Circular with full directions and with testimonials, on application. Price for Sample Canister, 2s. 6d. and 5s. 6d.; per $\frac{1}{2}$ cwt., 9s. 6d.; $\frac{3}{4}$ cwt., 18s.; 1 cwt., 34s.

TO HAVE DRY AND WARM FEET USE GISHURSTINE AS A DUBBING

On the Soles and Uppers of Boots and Shoes.

Gishurstine is sold in Tin Boxes, 6d. and 1s.; by post 9d. and 1s. 3d.

Gishurstine, specially prepared for hot climates, 9d. and 1s. 6d. per tin.

Directions for Use.—Warm the Boots, then rub in Gishurstine thoroughly all over upper Leathers, Welts, and Soles. This may be repeated once or twice a month, or oftener. One application makes leather soft and boots comfortable. Gishurstined boots take a good polish with blacking. Gishurstine has no unpleasant smell, and is otherwise an improvement on old-fashioned dubbing.

BARR'S PREPARED CHARCOAL AND COCOA FIBRE.

For growing Ferns in Plant Cases, and Bulbs in Jardinets, Glasses, &c.

Fill the Hyacinth glasses with the preparation, and then add water till no more can be absorbed. In the glass, place the bulb so as to rest the base on the preparation, then tie it down with brown paper as you would a jam-pot, leaving an opening in the centre of the paper for the shoot. When the bulb has well rooted the paper may be removed; care must be taken that the material in the glass is kept wet. The same remark applies to bulbs grown in vases; they must be kept in place till they have rooted. 5s. per bush.; 1s. 6d. per peck.

BARR & SON, 12 & 13 KING STREET, COVENT GARDEN, LONDON.

		each—s. d.
1457	<i>Oxalis cernua</i> var. <i>bermudiana</i> , The Bermuda Buttercup <i>Oxalis</i> , a charming winter-flowering bulb for indoor decoration, producing a luxuriance of graceful bright yellow flowers for some weeks. After potting keep in a dark cool position for a few weeks to root well, and then remove to a sunny window, or greenhouse.....	per doz. 4s. 6d. o 6
	<i>Pancratium calathinum</i> . A synonym of <i>Hymenocallis</i> , which see, page 31.	
1458 *	" <i>illyricum</i> , beautiful white flowers, with long filamentous outer segments. A fine pot-plant, or for planting under a south wall at a depth of a foot, 2 ft.	per doz. 10/6 1 0

1461	* <i>Pentlandia miniata</i> , a beautiful greenhouse bulb, with handsome crimson drooping flowers, 1½ ft. ...	1 0
1462	* <i>Phædranassa chloracea</i> , yellow, very fragrant, 1½ ft. p. doz. 5/6 } The <i>Phædranassas</i> (Queen Lilies) are handsome pot-plants, but may also be grown under a south wall, planted at the depth of a foot, flowers April to June. {	0 6
1463 *	" <i>rubro-viridis</i> , rich crimson, tipped green, 1½ ft. ...	1 6
1464 *	" <i>schizantha</i> , rich vermilion, tipped yellow and green	1 6
1465 *	" <i>ventricosa</i> , scarlet, protruding anthers, 1½ ft.	3 6
1466	* <i>Polygonatum multiflorum majus</i> , the larger-flowered form of Solomon's Seal, a graceful hardy plant. Valuable to naturalize in wild gardens and woods, or for early-forcing, 2 ft. p. doz. 3s. 6d.	o 4
1467	* <i>Richardia æthiopica</i> (The Lily of the Nile), large white trumpet-shaped flowers, established in pots per doz. 15s., 21s. & 30s.; each 1s., 1s. 6d., 2s. & 3s. 6d.	3 6
1468 *	" <i>nana</i> (Little Gem), new dwarf variety, with pure white flowers, beautiful in pots	1 0
1469 *	" <i>albo-maculata</i> , flowers white, foliage beautifully spotted white, an extremely effective pot-plant, and valuable for beds and borders.....	per doz. 4s. 6d. o 6
1470 *	" <i>hastata</i> , fine yellow flowers, with black centre and white-spotted leaves	4 6
1471 *	" <i>melanoleuca</i> , fine primrose flowers, with black centre	o 9
The <i>Richardias</i> are all greenhouse plants. <i>Albo-maculata</i> is much prized for its beautifully spotted foliage; <i>Hastata</i> for its fine yellow flowers. These two varieties may also be planted out-doors in spring for summer decoration.		
1472	* <i>Rigidella immaculata</i> , a beautiful Mexican bulbous plant, flowers brilliant orange-scarlet, in June, very showy, 1½ ft., same culture as for <i>Tigridias</i>	1 9
1473	* <i>Romulea Clusii</i> , large-flowered Portuguese species in various shades	per doz. 3s. 6d. o 4
1474 *	" <i>rosea</i> , var. <i>Leichtlini</i> (new), beautiful large satiny rose } Graceful little hardy plants, with grassy foliage and satiny flowers. Charming for sunny nooks on rockwork. {	2 6
1475 *	" <i>speciosa</i> , deep satiny carmine, ½ ft.	per doz. 1s. ...
1476	<i>Sanguinaria canadensis major</i> , white flowers in spring, borne above the coltsfoot-like leaves, truly charming; plant in moist peaty soils and shady places; perfectly hardy, ½ ft.	per doz. 3/6 o 4
1477	<i>Schizostylis coccinea</i> , rich scarlet <i>Gladioli</i> -like flowers in spikes. Quite hardy. It delights in a sheltered situation, amongst trees and shrubs. Established masses lifted in Autumn and potted, flower freely under glass for months, 1½ ft.	per 100, 10s. 6d.; per doz. 1/6 ...
Solomon's Seal. See <i>Polygonatum</i> .		
1478	<i>Sparaxis pulcherrima</i> , a remarkable plant, with a dense elegant grassy foliage, from which rise graceful wiry flower stems, 3 to 5 feet high, arching over in a broad graceful curve, from which hang beautiful bell-shaped flowers; quite hardy. Figured in "The Garden," 1888	1 6
1479	* <i>Tecophilæa cyaneocrocea</i> , a most beautiful Chilean spring-flowering bulb, of dwarf growth, bearing large crocus-like deep carulean blue flowers with white throat, delicately scented. It makes a charming pot-plant, or can be grown in a warm dry situation on rockwork, or under a south wall...	3 6
<i>Triteleia</i> . See <i>Milla</i> .		
1480	<i>Tropæolum azureum</i> , true, a beautiful rare bulb. Flowers rich violet-blue, white centre, very pretty	4 6
1481	" <i>Jarrattii</i> , scarlet, orange, and black	per doz. 5s. 6d. o 6
1482	" <i>pentaphyllum</i> , red and green, perfectly hardy	1 6
1483	" <i>polyphyllum</i> , golden-yellow flowers in long trusses, quite hardy	per doz. 5s. 6d. o 6
1484	" <i>speciosum</i> , bright vermilion-scarlet flowers in clusters, quite hardy; pots full of roots, per doz. 7s. 6d. & 10s. 6d.; 9d., 1s. & 1s. 6d.	o 4
1485 *	" <i>tuberosum</i> , yellow and red, very distinct, quite hardy. Plant in Spring, p. doz. 3s. 6d.	
The foregoing <i>Tropæolums</i> are all beautiful climbers. <i>Azureum</i> and <i>Jarrattii</i> are recommended for the greenhouse to trail over trellises, round pillars, etc. <i>Pentaphyllum</i> is a fine climber for warm sunny situations out-doors. <i>Polyphyllum</i> revels on a sunny rockwork. <i>Tuberosum</i> requires an open situation and poor soil, and should have branches to scramble over. <i>Speciosum</i> is one of the most lovely of hardy climbers, and may in the south of England be successfully grown if planted in a cool, moist situation, away from the sun's rays; it delights in a shady place, and especially near a stream where its roots can enjoy the water.		
1486	<i>Urceolina pendula</i> (syn. <i>aurea</i>), a splendid warm-house bulb, with large golden-yellow flowers, tipped with rich green, and produced in graceful drooping terminal clusters.....	2 6
1487	<i>Watsonia</i> , 6 in 6 named vars. 4/6 } The <i>Watsonia</i> is very ornamental and showy; {	
1488	" mixed varieties	requires same cultural treatment as the <i>Gladiolus</i> . { p. doz. 2s. 6d.
1489	<i>Zephyranthes Andersoni</i> (Habranthus), flowers brown and gold, ¾ ft.	5/6 ...o 6
1490	" <i>atamasco</i> , large pure white flowers, nearly 3 in. long, ht. ½ ft.2 0
1491	" <i>candida</i> , see <i>Amaryllis</i> , page 26.	
1492	" <i>carinata</i> , beautiful full rose, large handsome flowers, ht. 1 ft.I 6
1493	" <i>Treatia</i> , beautiful white fragrant lily-like flowers, ht. 1 ft.I 6
